1 Summary Statistics

1.1 Overall Summary Statistics

1.1.1 Seminar Speaker Demographics

Table 1: Overall Seminar Statistics

Statistic	Value
Number of seminars	1655
Number of unique departments	528
Total speakers across all seminars	23193
Mean speakers per seminar	14.01
SD speakers per seminar	9.90
Min speakers in a seminar	1
Max speakers in a seminar	76

Table 2: Seminar Speaker Demographics (Across All Seminars)

Demographic Group	Mean %	SD %	Mean Count	SD Count	Pct. Any
URM	7.42	11.10	1.00	1.28	54.1
Black	2.23	5.95	0.32	0.68	23.3
Hispanic	5.17	9.51	0.68	1.01	42.7
Female	16.97	16.17	2.40	2.47	76.1

Note: N = 1655 seminars. Percentages calculated among speakers with demographic data available. 'Pct. Any' indicates the percentage of seminars that have at least one speaker from that demographic group.

1.1.2 Department Faculty Demographics

Table 3: Department Faculty Demographics

Statistic	Mean	SD
Total faculty per department	34.0	18.1
% URM faculty	4.09	4.40
% Women faculty	20.40	7.58

Note: N = 528 unique departments. Department faculty demographics based on 2024 coding.

2.3 Seemingly Unrelated Regression (SUR) Analysis

Table 11: SUR Analysis: Testing Substitution Between URM and Non-URM Speakers

Outcome	Coefficient	SE
URM Speakers	0.1006	(0.0630)
Non-URM Speakers	-0.6088	(0.4599)
Sum of Effects	-0.5081	—

Wald Test: H_0 : Treatment effect on URM + Treatment effect on Non-URM = 0

Note: SUR estimation with simple controls allows for correlation between equation errors. The Wald test examines whether the treatment effect represents a pure substitution (increasing URM speakers while decreasing non-URM speakers by the same amount).

6.33 Junior vs Senior Speaker Analysis

6.33.1 Analysis: Treatment effects on representation by speaker career stage

This analysis examines whether the treatment differentially affects the representation of junior versus senior speakers. We define: - **Junior speakers**: Those below the median years since PhD completion - **Senior speakers**: Those above the median years since PhD completion

We analyze treatment effects on three types of outcomes for each demographic group (URM, Black, Hispanic): 1. **Percentage**: What percentage of speakers from a demographic group are junior (or senior)? 2. **Count**: How many speakers from a demographic group are junior (or senior)? 3. **Binary**: Does the seminar have any junior (or senior) speakers from this demographic group?

6.34 Seniority Data Coverage

Total seminars analyzed: 1655\ [0.3em] Seminars with junior speakers: 1518 (91.7%)\ [0.3em] Seminars with senior speakers: 1536 (92.8%)\ [0.3em] Mean junior speakers per seminar: 5.99\ [0.3em] Mean senior speakers per seminar: 5.87\ [0.3em] Median years since PhD (cutoff): 12.0\ [0.5em]
